

An integrated system of 3 big business processes, that is Maintenance, Logistic, and Procurement. The maintenance of Defense Equipment as a strategic asset of Military unit requires a management system in each of its activity in order to prolong the Defense equipment lifetime. Furthermore, the information needs of the Equipment readiness are important for Military Unit. This system will provide that information quickly and accurately.

BENEFITS :

1. Supporting the management of Defense Equipment, such as aircraft, radar, missile and the parts.
2. Integrating the process of the procurement, briefing, distribution, and maintenance of Defense Equipment.
3. Displaying and monitoring the usage history and the maintenance of Defense Equipment.
4. Optimizing the maintenance process of Defense Equipment.
5. Increasing the efficiency and the readiness of defense logistics.
